

Bridge Assistive Donation Form

Bridge Assistive will require the collection of some personal information from individuals to enable it to provide customised solutions and customer service, and to perform basic analysis of its not-for-profit services (using de-identified data). Sensitive information collected by Bridge Assistive will not be used for any other purpose without the express permission of the individual.

Please be aware that the Bridge Assistive customer relationship management (CRM) system is linked to the Link Assistive CRM system. Link Assistive is a commercial Australian supplier of sensory, interactive, and assistive technologies and will donate (clinical and technical) support and shipping services to Bridge Assistive. The link between the two CRM systems is necessary for Link Assistive to access the necessary data to support the use and arrange the shipping of the donated communication devices.

By accepting this equipment donation, you understand and agree to personal information being collected and why.

Should the equipment not operate properly when it arrives, please notify Bridge Assistive immediately upon noticing the malfunction and request instructions.

Future studies

In the future, you may be asked to participate in research to evaluate the use of communication devices. Participation in such research is voluntary. If you don't wish to take part, you don't have to, it won't change any services you receive associated with the donated device. Any additional data that will be collected as part of these studies will be entered in a database that will only be accessible by the principal investigator and project managers and won't be linked to the Bridge Assistive and/or Link Assistive CRM systems.

Please sign this form and return to Bridge Assistive (office@bridgeassistive.com) a.s.a.p.

I have read and fully understood the Conditions of Equipment Donation and hereby agree to same.
